

# WHY LOGICALLY? We're not just another supplier...

## PARTNER with one of the fastest growing MSPs and largest MSSPs in the nation

- 2,200+ valued clients
- 70+ hungry sellers
- 20+ years living and breathing cybersecurity
- 12+ high impact locations across the US

## GROW sales with a fully managed, hassle-free security offering

Our clients don't sacrifice performance for security. We don't just deploy technology, we actively manage it with processes that have been vetted by highly certified security professionals over 10+ years. Our clients enjoy the tightest security posture AND highest performing and high available IT environments.

### CORE SECURITY SERVICES

#### → Managed Firewall (mFW+SD-WAN+SOCaaS)

We make enterprise managed firewall solutions available to any company, of any size, anywhere. We help ensure business security with highly trained and certified security professionals, top-tier products and 24/7 support.

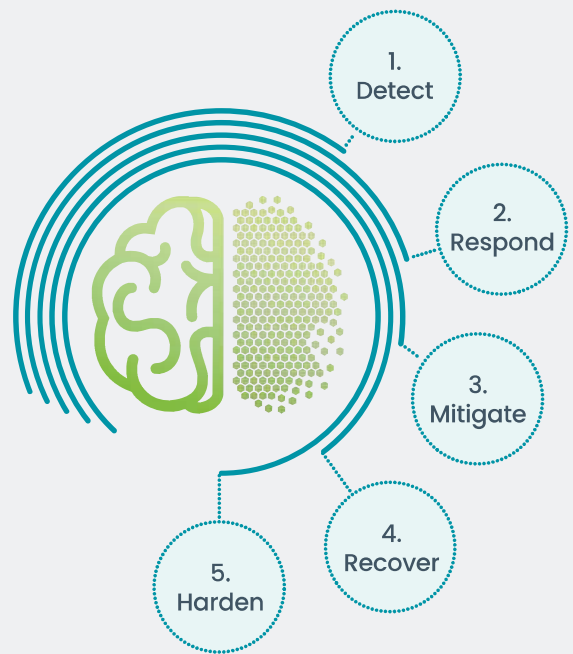

#### → Extended Detection and Response (mXDR)

We combine powerful AI and Machine Learning SIEM technology to delivers actionable alerts in real time, without the noise. Our SOC analysts team then delivers exceptional 24x7 manned response and remediation service.

#### → Secure Remote Access

BYOD networks and remote employees are increasingly common. We have multiple bundles that help expand and secure all layers of client environments to ease your support burden and ensure secure employee connectivity, wherever they reside.
